

Corferias extends the term of use of its facilities to continue the operation of the Temporary Transitional Hospital Center

- *Corferias and the Bogotá Chamber of Commerce remain committed to the measures taken at the country and city level for the management of the pandemic, so, in response to the request generated by the Integrated Subnet of Services Centro Oriente E.S.E., extended the deadline established for the use of its facilities until August 31, at no cost of soil or lease in favor of Corferias, to continue the Temporary Transitional Hospital Center by the authorities.*
- *This extension, requested by the Integrated Subnet of Services Centro Oriente E.S.E. is held under the initial conditions in which Corferias will not generate any charge for renting spaces and without any consideration of commercial benefit.*

Bogotá, June 2020. Committed to the city and the country, since last April, the Bogotá Chamber of Commerce and Corferias complied with the official delivery of the assembly and facilities of the fairgrounds of Corferias for the implementation of the Temporary Transitional Hospital Center in order to expand the hospital capacity to deal with the emergency generated by COVID-19.

This is how today the remain committed and reaffirm their solidarity and support to the city and country with the actions and measures taken by the National Government and the Mayor of Bogotá at the head of the Secretary of Health to face the management of the pandemic, so, in response to the request generated by the Integrated Subnet of Services Centro Oriente E.S.E. have decided to extend the time of use of its facilities with an extension that will allowed the use of the fairgrounds as a transitional hospital until August 31, 2020 without generating any charge by concept or rental of spaces and without any consideration of commercial benefit.

The costs that are related in this extension to the contract signed with the Integrated Subnet of Health Services Centro Oriente E.S.E. are solely due to the collection of public services that are actually consumed on the value invoiced by the respective lending companies and the value of the rentals of health elements supplied by third parties, derived from the operation and function of the Temporary Transitional Hospital for the time that is extended. Thus Corferias and the Bogotá Chamber of Commerce maintain their commitment and support.
